

AN INITIATIVE OF
Indian Plumbing Association

Certified Water Management Professional

Training Program

PROSPECTUS

The online training program is designed to provide participants with a holistic understanding of water management practices and prepare them for real-world challenges in the field of water auditing and management.

This Two day intensive online training program offers a unique opportunity to learn from distinguished faculty members from leading institutions across India. The program integrates theoretical sessions, case studies, and interactive discussions to provide participants with a comprehensive understanding of water management principles and water neutrality.

By the end of the training, participants will be equipped with the knowledge and skills required to conduct water audits and contribute effectively to water resource management initiatives in the built environment, supporting the journey toward sustainable water neutrality.

Duration: 2 days, (16 hours)

Preferably weekend

Eligibility:

- Bachelor of Technology (B. Tech)/B. Arch/Diploma in Civil, Architecture, Electrical, Mechanical, Environmental Engineering, or related fields.
- MEP Consultants, Urban Planners, and Experienced Professionals from the Water Utility Sector and Operational Experienced in Hospitality, Medical and other related fields

Examination:

At the conclusion of the online training program, participants will take a 30-minute computer-based exam focused on real-time scenarios to evaluate their grasp of the concepts covered. Those who successfully complete the exam will earn certification as Certified Water Auditors, a pivotal role in the emerging field of water management.

Fee Structure:

Program Fee : INR 15,000
GST (18%) : INR 2,700
Total Payable Amount : INR 17,700

Bank Details for Payment:

Account Number: 50100482380116
Account Holder:
Indian Plumbing Association
Bank Name: HDFC Bank
IFSC Code: HDFC0000578

BECOME A CERTIFIED WATER MANAGEMENT PROFESSIONAL

Water is a critical and increasingly scarce resource, often regarded as valuable as oil in today's world. As global water scarcity intensifies, the field of water management presents significant professional and business opportunities. Aligned with the Government of India's Sustainability 2030 goals, the Certified Water Management Professional (CWMP) program empowers individuals to play a vital role in the sustainable management and conservation of water resources.

Water management has become an essential practice in the built environment, encompassing water efficiency, conservation, reuse, auditing, and sustainable resource planning. As a Certified Water Management Professional (CWMP), you will gain expertise in evaluating and improving water management systems and strategies across various sectors.

The CWMP training program equips participants with the technical knowledge, practical skills, and industry insights required to excel in the field of sustainable water management. Covering key principles and best practices in water conservation, water auditing, efficiency optimization, and resource management, the program prepares professionals to make a meaningful impact toward achieving water sustainability and neutrality goals.

FACULTY

Dr. Manish Goyal

Dean, IIT Indore
(Recycle, reuse of greywater,
Integrated water management)

Dr. Deepak Khare

Dean, IIT Roorkee
(Bharat Taps, Water-efficient
fixtures and appliances)

Dr. Pennan

Professor, IIT Bombay
(Integrated water management
and stormwater management)

Dr. Sunil Kumar

Former Chairman,
Central Ground Water Board
(Aquifer management)

SUBJECTS COVERED:

- ✓ Introduction to Water Sustainability and Audit Practices
- ✓ Integrated Water Management and Conservation Policy Frameworks
- ✓ Water Footprint Analysis and Future Trends in Water Management
- ✓ Principles of Environmental Economics, Governance, and Policy in Water Management
- ✓ Rainwater Harvesting and Greywater Recycling Techniques
- ✓ Resilience Planning in Hydrology and Watershed Management
- ✓ Advanced Topics in Water Resource Management
- ✓ Water-Efficient Fixtures and Smart Usage Solutions
- ✓ Water Neutrality and Net Zero Water Strategies
- ✓ Two-Pipe System Design and Implementation

About Certified Water Management Professional

A Certified Water Management Professional (CWMP) is a trained and certified expert in sustainable water management practices. By identifying opportunities to reduce water consumption and enhance operational performance, they help organizations move toward responsible water stewardship and long-term water sustainability goals.

About Water Audit Council

The Water Audit Council (WAC), an initiative of the Indian Plumbing Association (IPA), is dedicated to promoting water sustainability across India through water audits of built-up areas. WAC's mission is to transform water-use efficiency in the built environment, emphasizing that saving water is synonymous with saving money.

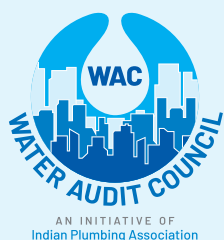

About Indian Plumbing Association

The Indian Plumbing Association (IPA) is the leading NGO and apex body of plumbing professionals in India. Established in 1993, IPA promotes the development of the plumbing and building services industry. With over 13,000+ members and 28+ chapters from various segments of the construction industry, including consultancy, manufacturing, contracting, trading, academia, and architecture, IPA plays a crucial role in advancing industry standards and practices.

Join Us in Making a Difference

India faces exceptional water demand due to its large population, rapid urbanization, and booming manufacturing and construction sectors, leading to significant water stress. By undertaking a water management professional training program with the Water Audit Council (WAC), you are not just saving water and money but also contributing to a sustainable future. Together, we can create a more water-efficient world.
